 Re: Proposed Air Permit
 Hyperion
 Union County South Dakota
 Dear Sirs,

I am writing in concern over Hyperion's request for an air permit to build a refinery in the Union County area of South Dakota.

My first concern is that there are no plans for an environmental impact study. Will this be the standard Hyperion is held to for every step they take in fulfilling their promise to have the most up to date and environmentally clean refinery! If so they will have the freedom to do whatever even if it is not good for the people or property in Union County.

The people who live here need to be represented. It appears that our Governor and Hyperion will have this project no matter how it affects this area or the people living here.

My second concern is for the air quality of this area. There are few places

left with quality air. Why not build a refinery in an area already designated for such industrial use? Hyperion says they have other locations available to build. Union County South Dakota is an area already growing in quality businesses and population. Let's keep the air quality as it is so that these industries will continue to want to develop here and people will want to live here.

My third concern is that the hearing concerning the air permit is being held in Pierre. This makes it difficult for those who want to be heard to attend this meeting. A location in Union County would be more beneficial and appropriate.

Sincerely

Jacquelyn Heckathorn
